Journal of Neuroscience Methods, 44 (1992) 245–246
Elsevier Science Publishers B.V.

Contents of Volume 44

Number 1 – August 1992

Research papers

In vitro electroreceptor organs for pharmacological studies
G.N. Andrianov, F. Bretschneider, R.C. Peters and P.F.M. Teunis (Russia, The Netherlands, Germany) 1

Fluorescent labeling of dissociated fetal cells for tissue culture
C.G. Paramore, D.A. Turner and R.D. Madison (USA) 7

A new method of mounting and directing chronically implanted microdrives
J.G. Malpeli, T.G. Weyand and R. LaClair (USA) 19

An improved HRP method for tracing axons in whole-mount preparations during early stages of regeneration in peripheral nerves of adult animals
D. Tonge, M. Edbladh, A. Edström and M. Kanje (Sweden) 27

Quantitative microdialysis of dopamine in the striatum: effect of circadian variation
A.D. Smith, R.J. Olson and J.B. Justice, Jr. (USA) 33

Positioning device for magnetically sensitive environments
D.B. MacHattie and L.D. Pengelly (Canada) 43

Quantal analysis using maximum entropy noise deconvolution
D.M. Kullmann (USA) 47

Purification of embryonic rat motoneurons by panning on a monoclonal antibody to the low-affinity NGF receptor
W. Camu and C.E. Henderson (France) 59

In situ hybridization of whole-mounts of *Aplysia* ganglia using non-radioactive probes
J.K. Ono and R.E. McCaman (USA) 71

A gated differential amplifier for recording physiological responses to electrical stimulation
R.E. Millard, K.I. McAnally and G.M. Clark (Australia) 81

Numbers 2,3 – September 1992

Research papers

Further refinement of the *Escherichia coli* brain abscess model in rat
J.M. Nazzaro, M.A. Pagel and E.A. Neuwelt (USA) 85

An intracellular medium formulary
A.R. Kay (USA) 91

Pattern generator system as a versatile visual stimulator
D.A. Kramer, H.L. Greene and J.M. Jagadeesh (USA) 101

A sensitive ELISA for glial fibrillary acidic protein: application in CSF of children
L.E. Rosengren, G. Ahlsén, M. Belfrage, C. Gillberg, K.G. Haglid and A. Hamberger (Sweden) 113

Rat exploratory behavior controlled by intracranial self-stimulation improves the study of place cell activity
M. Fukuda, T. Kobayashi, J. Bures and T. Ono (Japan, Czechoslovakia) 121

A method for fixation of previously fresh-frozen human adult and fetal brains that preserves histological quality and immunoreactivity
E.G. Jones, S.H.C. Hendry, X.-B. Liu, S. Hodgins, S.G. Potkin and W.W. Tourtellotte (USA, Canada) 133

Assessing short-term recognition memory with forced-choice psychophysical methods
A.T. Cacace, D.J. McFarland, J.F. Emrich and J.S. Haller (USA) 145

A simple electronic device for time-lapse recording of neural and other cell movements using a home video cassette recorder
D.P. Struwe, Z. Wang, A. Droog, M. Van Graft, M. Deenen, E. Marani and D.L. Ypey (The Netherlands) 157

Intracellular injections of permanent tracers in the fixed slice: a comparison of HRP and biocytin
L.-A. Coleman and M.J. Friedlander (USA) 167

Computer simulation of the blood–brain barrier: a model including two membranes, blood flow, facilitated and non-facilitated diffusion
G.A. Oyler, R.B. Duckrow and R.A. Hawkins (USA) 179

Production of a serial position effect in rats using a 12-arm radial maze
D.N. Harper, J.C. Dalrymple-Alford and A.P. McLean (New Zealand) 197

The use of texture analysis for the discrimination of Nissl substance in neurons
R.B. De Heus and P.C. Diegenbach (The Netherlands) 209

Photochromic intensification of diaminobenzidine reaction product in the presence of tetrazolium salts: applications for intracellular labelling and immunohistochemistry
D.I. Vaney (Australia) 217

Slices from the rat olfactory bulb maintained in vitro. Morphological aspects
F. Hajós, B. Gerics and P. Sótonyi (Hungary) 225

The effects of low-pass filtering on the flash visual evoked potential of the albino rat
N.A. Shaw (New Zealand) 233
